To Whom It May Concern,

I am delighted to write this letter of recommendation for **Mr. Yishu Chen**, a diligent and dedicated student I had the pleasure of teaching during his undergraduate studies at **Tiangong University**. **Yishu excelled** in my **Numerical Control Technology course**, achieving an impressive score of 82, ranking among the top few in the class. His performance in this course left a strong impression on me, as only a few students managed to reach this level of excellence.

In my course, **Yishu's** projects consistently stood out. For instance, he took the lead in group experiments, including recognizing the structure and performing basic operations on **CNC machine tools** and manual programming for CNC lathes. As the group leader, Yishu utilized **FANUC-based CNC programming** to perform tasks such as defining tool paths, setting spindle speeds, and **programming G-code for precision** turning operations. He also ensured the accurate alignment of tools and verified the machined components against design specifications. His leadership and technical expertise significantly contributed to his group achieving excellent results, showcasing his readiness for challenging graduate-level research.

Beyond academics, Yishu demonstrated a strong commitment to personal growth through extracurricular activities and entrepreneurship. In 2023, he **volunteered** at Tianjin Shenyu Skateboarding Club for four months, teaching children skateboarding, organizing events, and overseeing competitions, which enhanced his leadership and communication skills. During his academic leave, he also initiated and managed **a startup venture**, further developing his problem-solving, resource management, and adaptability—skills that will undoubtedly benefit him in his future academic and professional endeavors.

While Yishu's overall GPA may not fully reflect his capabilities, his **remarkable improvement during his junior year** and his exceptional performance in my course are strong indicators of his academic potential. His motivation and intellectual curiosity will undoubtedly drive him to excel in the Master's program at Lakehead University.

I strongly recommend Yishu for your program. He possesses the skills, determination, and passion needed to thrive in the field of mechatronics. Please do not hesitate to contact me at xiaoshu573@gmail.com or [+86-15510931139](tel:+8615510931139) for further details.
